Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-10, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by either Eisenberg et al., MacMartin, or Walker.

Eisenberg et al., MacMartin, and Walker all show holders for scouring devices for releasably securing a scouring device between opposing legs wherein a user can release a scouring device from the holder without having to directly touch the scouring device.

3. Claims 1, 2, 4-10, and 12-14 are rejected under 35 U.S.C. 102(b) as being anticipated by French Patent # 711452.

French Patent # 711452 shows several embodiments of holders for scouring devices each comprising a pair of opposed legs having gripping assemblies at their free ends. Figure 6 shows outwardly oriented teeth (b,b') that are biased to an expanded position (see the dashed lines in Fig. 6) to grip a scouring pad.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3652

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Eisenberg et al., MacMartin, or Walker in view of German Patent # 3530401.

The Eisenberg et al., MacMartin, and Walker patents were presented above in section 2 and substantially show the invention as set forth in claim 3 except for the gripping means comprising a plurality of hooks.

However, German Patent # 3530401 shows an embodiment of a pad holder in Figures 1 and 5 comprising a plurality of hook-shaped gripping means (16,16') for engaging a pad (20).

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the teeth of either the Eisenberg et al., MacMartin, or Walker holder with hook-shaped gripping means as taught by the German ('401) patent as an alternative yet functionally equivalent means of securing a pad to the holder.

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Eisenberg et al., MacMartin, or Walker in view of Milano.

Milano shows a holding device operated by a users fingers comprising a pair of opposing legs each having a textured surface (62) for enhancing a user's grip.

It would have been obvious to a person having ordinary skill in the art to provide a textured grip enhancing surface on the outer surface of either the Eisenberg et al., MacMartin, or Walker legs as taught by Milano so that a user could enjoy a more secure and comfortable grip on the holder.

Drawings

8. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the gripping means comprising a plurality of hooks, as recited in claim 3, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

9. The drawings are objected to because it appears that in Figure 3, which shows a top view of the holder, the teeth (16) should be shown in dashed or phantom lines. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gewirz and Strader both show scouring pad holders having expandable gripping means at the ends of opposing legs.
